

Attachment A - Louisiana Delisting for Oil and Grease for Mermentau  
and Vermilion-Teche River Basins

3/29/01

1. LA subsegment 050101, Bayou Des Cannes - Headwaters to Mermentau R. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
2. LA subsegment 050103, Bayou Mallet. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
3. LA subsegment 050201, Bayou Plaquemine Brule - Headwaters to Bayou Des Cannes. Delist for oil and grease based on six State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
4. LA subsegment 050501, Bayou Queue de Tortue - Headwaters to Mermentau R. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
5. LA subsegment 050901, Mermentau River Basin Coastal. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
6. LA subsegment 060802, Vermilion R. - From New Flanders (Ambassador Caffery) Bridge at Hwy 3073 to Intracoastal Waterway. Delist for oil and grease based on five State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
7. LA subsegment 060902, Bayou Carlin (Delcambre Canal) - L. Peigneur to Bayou Petite Anse (Estuarine). Delist for oil and grease based on four State visual inspections and three EPA visual inspections. One EPA and State visual inspection conducted on the same day indicated the presence of a sheen described as "small spotty sheen from boat bilge." Four water samples collected that same day and analyzed for oil and grease had results of <5 mg/l. Two other water samples collected on other days and analyzed for oil and grease had results of <5 mg/l and 6 mg/l. All other state and EPA inspections were negative for a visual sheen.
8. LA subsegment 060904, Vermilion R. Basin New Iberia Southern Drainage Canal. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were negative, except for one EPA visual which indicated the presence of some oil ribbons along the shore.
9. LA subsegment 060907, Franklin Canal. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were

negative, except one EPA visual inspection which indicated the presence of some oil ribbons and one EPA visual inspection which indicated the presence of one small 6" diameter oil patch.

10. LA subsegment 061101, Bayou Petite Anse. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
11. LA subsegment 060804, Intracoastal Waterway. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
12. LA subsegment 060901, Bayou Petite Anse. Delist for oil and grease based on four State visual inspections and four EPA visual inspections. All of the visual inspections were negative.
13. LA subsegment 050402, Lake Arthur and Lower Mermentau. Delist for oil and grease based on eight State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
14. LA subsegment 050602, Intracoastal Waterway. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
15. LA subsegment 050701, Grand Lake. Delist for oil and grease based on six State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
16. LA subsegment 050702, Intracoastal Waterway. Delist for oil and grease based on eight State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
17. LA subsegment 050703, White Lake. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
18. LA subsegment 060205, Bayou Teche - Headwaters at Bayou Courtableau to I-10. Delist for oil and grease based on five State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
19. LA subsegment 060212, Chatlin Lake Canal and Bayou DuLac. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
20. LA subsegment 060701, Tete Bayou. Delist for oil and grease based on three State visual

inspections and three EPA visual inspections. All of the visual inspections were negative.

21. LA subsegment 060702, Lake Fausse Point and Dauterive Lake. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
22. LA subsegment 060803, Vermilion River Cutoff. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
23. LA subsegment 060906, Intracoastal Waterway. Delist for oil and grease based on three State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
24. LA subsegment 060910, Boston Canal and Associated Canals (Estuarine). Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All visual inspections were negative, except one EPA visual inspection which indicated the presence of a minor sheen which was not considered significant. Four water samples collected and analyzed for oil and grease on that day were all <5 mg/l. Two samples collected during other site visits were also <5 mg/l.
25. LA subsegment 061102, Intracoastal Waterway. Delist for oil and grease based on the results of visual inspections of all waterways leading into this subsegment. The inspections of these waterways indicated that they were either negative for oil and grease or did not exhibit significant oil and grease shows.
26. LA subsegment 061103, Freshwater Bayou Canal. Delist for oil and grease based on four State visual inspections and three EPA visual inspections. All of the visual inspections were negative.
